Learning Outcomes

Upon successful completion of this course, participants will be able to:

- Resolve organisational issues that impede Agile team development

- Match Agile coaching styles to the maturity level of your teams

- Avoid "story card hell" through effective backlog management

- Apply Scrum to portfolio management and multiple team projects

- Develop agility assessments for improving team performance

Detailed Course Outline

Reviewing Agile Development and the Scrum Framework

- Realising the strategic role of the Product Owner

- Treating the Product Backlog order as the critical path

- Building better processes through Scrum

Growing Agile Teams with Proper Methodology

Developing coaching skills

- Applying different Agile coaching styles

- Climbing the Shu-Ha-Ri ladder of attainment

- Practising servant-leadership

Achieving continuous improvement

- Prioritising business value as the primary concern

- Emphasising Scrum's self-management versus the approach of other Agile methodologies

Organising around value-driven software

- Reinforcing the strategic role of the Product Owner

- Ordering the Product Backlog dynamically to determine the project's critical path

- Sniffing out bad "smells" in Scrum Teams

Delivering High Performance with Agile Team Training

Employing advanced team practices

- Distilling requirements with Acceptance Test Driven Development (ATDD)

- Designing products through Test Driven Development (TDD)

- Integrating functional increments continuously

Scaling Agile development

- Coordinating the work of multiple teams

- Applying Continuous Integration (CI) for large projects

Accelerating organisational change

- Exposing dysfunctions in the software development process

- Driving change through the Scrum Master role

Managing Backlogs

Prioritising product requirements

- Separating concerns with value propositions

- Organising Epics and Stories

- Story-Mapping to visualise backlog

Slicing and dicing Stories

- Planning releases with Minimal Marketable Features (MMF)

- Characterising a well-formed Product Backlog

- Avoiding "Story Card Hell"

Streamlining Team Progress with Lean Thinking

Maximising the amount of "work not done"

- Thinking Lean to eliminate waste

- Comparing Lean and Kanban to Scrum

- Identifying opportunities to eliminate rework

Implementing Lean thinking

- Prioritising resources with Agile portfolio management

- Visualising throughput with Cumulative Flow Diagrams

- Reallocating resources to eliminate bottlenecks

Improving and Measuring Team Performance

Assessing agility

- Measuring the delivery of business value

- Defining team performance

- Selecting metrics that support self-management

Implementing improvement through Agile development process

- Creating Improvement Backlogs

- Tracking the removal of impediments

- Developing a momentum for success

Planning for External Dependencies

Resourcing projects

- Integrating contractors into Scrum teams

- Outsourcing to third parties

- Running geographically dispersed teams

Relating to external constraints

- Mapping external dependencies

- Addressing the slow-moving infrastructure team issue

- Working with deployment teams

Generalising Scrum in the Wider Organisation

Scaling Scrum

- Gaining support for Scrum

- Creating Agility assessments

- Addressing impediments at the enterprise level

Skills You Will Learn:

- Resolve organisational issues that impede Agile team development

- Match Agile coaching styles to the maturity level of your teams

- Avoid "story card hell" through effective backlog management

- Apply Scrum to portfolio management and multiple team projects

- Develop agility assessments for improving team performance
