Agile Business Analysis

Category: Project Management & Business Skills | **Vendor:** Various

Rating: ⭐ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Course Overview

Agile business analysis plays a critical role in delivering customer value in today’s fast-paced, ever-changing environment. According to the Project Management Institute (PMI), organizations that embrace Agile approaches are 28% more successful than those that don’t. This interactive, hands-on two-day course gives business analysts and Agile team members the skills to contribute meaningfully to iterative product development. You’ll learn how to adopt an Agile mindset, collaborate effectively across teams, and prioritize what matters most to stakeholders. The course explores how Agile techniques can streamline business processes and improve responsiveness to change. Through real-world exercises and collaborative scenarios, you’ll practice writing user stories, mapping value, refining product backlogs, and supporting Agile planning. By the end of the course, you’ll be equipped to drive better business outcomes through continuous delivery and informed decision-making.

About This Course

Agile business analysis plays a critical role in delivering customer value in today’s fast-paced, ever-changing environment. According to the Project Management Institute (PMI), organizations that embrace Agile approaches are 28% more successful than those that don’t. This interactive, hands-on two-day course gives business analysts and Agile team members the skills to contribute meaningfully to iterative product development. You’ll learn how to adopt an Agile mindset, collaborate effectively across teams, and prioritize what matters most to stakeholders. The course explores how Agile techniques can streamline business processes and improve responsiveness to change. Through real-world exercises and collaborative scenarios, you’ll practice writing user stories, mapping value, refining product backlogs, and supporting Agile planning. By the end of the course, you’ll be equipped to drive better business outcomes through continuous delivery and informed decision-making.

Who Should Attend

This course is intended for business analysts familiar with Agile or those performing business analysis tasks in an Agile environment. It is also suitable for anyone wanting to learn Agile analysis in depth or for those in an organization planning to expand their Agile BA practices.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

In this training course, you'll explore how business analysts support Agile teams throughout the product lifecycle. You'll learn to apply Agile principles to elicit and manage requirements, write and refine user stories, and build a product backlog that aligns with customer value. You'll also examine the role of the business analyst in Scrum events and planning sessions, as well as techniques like impact mapping, story mapping, and sprint retrospectives.
