AI Fundamentals with Prompt a Thon using Google NotebookLM

Category: AI, Data & Analytics | **Vendor:** Google Cloud

Duration: 8.00 hours (1 days) **6.5 CPD Hours** **Rating:** ⭐ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Course Overview

This course gives students a clear start in understanding AI along with hands on practice using Google NotebookLM. The morning helps students learn what AI is, how NotebookLM works, and how to write prompts that lead to useful results. The afternoon turns the room into a working space where students explore a real problem and build a small solution with NotebookLM through a guided Prompt a Thon. Students finish the day with stronger skills in AI thinking, prompt design, and practical use of NotebookLM.

About This Course

This course gives students a clear start in understanding AI along with hands on practice using Google NotebookLM. The morning helps students learn what AI is, how NotebookLM works, and how to write prompts that lead to useful results. The afternoon turns the room into a working space where students explore a real problem and build a small solution with NotebookLM through a guided Prompt a Thon. Students finish the day with stronger skills in AI thinking, prompt design, and practical use of NotebookLM.

Who Should Attend

Employees or teams who want to understand AI and start using NotebookLM to support daily work.

No technical background required.

Prerequisites & Entry Requirements

General Prerequisites:

Comfort with a computer and basic internet use. No AI experience needed.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

Explain AI in simple terms and describe common workplace uses Describe the purpose and core features of Google NotebookLM Use NotebookLM to explore files, sources, summaries, and ideas Write clear prompts that guide NotebookLM toward helpful outputs Improve prompts through simple changes that add clarity or context Apply structured prompting during the Prompt a Thon Build and present a small AI supported solution based on a real need

Detailed Course Outline
