CCSP Certified Cloud Security Professional Certification Prep

Category: Networking & Security | **Vendor:** ISC2

Duration: 5.00 hours (1 days) **4.1 CPD Hours** **Rating:** ⭐ 4.6 (5,878 reviews)

Course Information

Delivery Format:	vILT
Certification:	Certified Cloud Security Professional (CCSP)
Related Exam:	CCSP

Course Overview

Develop the skills for administering security controls and protecting cloud infrastructure. Certified Cloud Security Professional CCSP certification training course enables experienced security professionals to understand cloud frameworks, implement data security, perform a security risk analysis, manage identity, and more.

About This Course

Develop the skills for administering security controls and protecting cloud infrastructure. Certified Cloud Security Professional CCSP certification training course enables experienced security professionals to understand cloud frameworks, implement data security, perform a security risk analysis, manage identity, and more.

Prerequisites & Entry Requirements

General Prerequisites:

Experienced information security professionals with at least five years of IT experience, including three years of information security and at least one year of cloud security experience.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

Certified Cloud Security Professional (CCSP) Course Objectives:Understand legal frameworks and guidelines that affect cloud servicesRecognize the fundamentals of data privacy regulatory/legislative mandatesAssess risks, vulnerability, threats, and attacks in the cloud environmentEvaluate the design and plan for cloud infrastructure security controlsEvaluate what is necessary to manage security operationsUnderstand what operational controls and standards to implementDescribe the types of cloud deployment models in the types of “as a service” cloud models currently available todayIdentify key terminology, and associated definitions related to cloud technologyEstablish a common terminology for use with in your team or workgroupBuild a business case for cloud adoption and determine business units that benefit from cloud migration strategies, Certified Cloud Security Professional (CCSP) Course Objectives:Understand legal frameworks and guidelines that affect cloud servicesRecognize the fundamentals of data privacy regulatory/legislative mandatesAssess risks, vulnerability, threats, and attacks in the cloud environmentEvaluate the design and plan for cloud infrastructure security controlsEvaluate what is necessary to manage security operationsUnderstand what operational controls and standards to implementDescribe the types of cloud deployment models in the types of “as a service” cloud models currently available todayIdentify key terminology, and associated definitions related to cloud technologyEstablish a common terminology for use with in your team or workgroupBuild a business case for cloud adoption and determine business units that benefit from cloud migration strategies, Certified Cloud Security Professional (CCSP) Course Objectives:Understand legal frameworks and guidelines that affect cloud servicesRecognize the fundamentals of data privacy regulatory/legislative mandatesAssess risks, vulnerability, threats, and attacks in the cloud environmentEvaluate the design and plan for cloud infrastructure security controlsEvaluate what is necessary to manage security operationsUnderstand what operational controls and standards to implementDescribe the types of cloud deployment models in the types of “as a service” cloud models currently available todayIdentify key terminology, and associated definitions related to cloud technologyEstablish a common terminology for use with in your team or workgroupBuild a business case for cloud adoption and determine business units that benefit from cloud migration strategies, Certified Cloud Security Professional (CCSP) Course Objectives:Understand legal frameworks and guidelines that affect cloud servicesRecognize the fundamentals of data privacy regulatory/legislative mandatesAssess risks, vulnerability, threats, and attacks in the cloud environmentEvaluate the design and plan for cloud infrastructure security controlsEvaluate what is necessary to manage security operationsUnderstand what operational controls and standards to implementDescribe the types of cloud deployment models in the types of “as a service” cloud models

currently available todayIdentify key terminology, and associated definitions related to cloud technologyEstablish a common terminology for use with in your team or workgroupBuild a business case for cloud adoption and determine business units that benefit from cloud migration strategies, Certified Cloud Security Professional (CCSP) Course Objectives:Understand legal frameworks and guidelines that affect cloud servicesRecognize the fundamentals of data privacy regulatory/legislative mandatesAssess risks, vulnerability, threats, and attacks in the cloud environmentEvaluate the design and plan for cloud infrastructure security controlsEvaluate what is necessary to manage security operationsUnderstand what operational controls and standards to implementDescribe the types of cloud deployment models in the types of “as a service” cloud models currently available todayIdentify key terminology, and associated definitions related to cloud technologyEstablish a common terminology for use with in your team or workgroupBuild a business case for cloud adoption and determine business units that benefit from cloud migration strategies, Certified Cloud Security Professional (CCSP) Course Objectives:Understand legal frameworks and guidelines that affect cloud servicesRecognize the fundamentals of data privacy regulatory/legislative mandatesAssess risks, vulnerability, threats, and attacks in the cloud environmentEvaluate the design and plan for cloud infrastructure security controlsEvaluate what is necessary to manage security operationsUnderstand what operational controls and standards to implementDescribe the types of cloud deployment models in the types of “as a service” cloud models currently available todayIdentify key terminology, and associated definitions related to cloud technologyEstablish a common terminology for use with in your team or workgroupBuild a business case for cloud adoption and determine business units that benefit from cloud migration strategies, Certified Cloud Security Professional (CCSP) Course Objectives:Understand legal frameworks and guidelines that affect cloud servicesRecognize the fundamentals of data privacy regulatory/legislative mandatesAssess risks, vulnerability, threats, and attacks in the cloud environmentEvaluate the design and plan for cloud infrastructure security controlsEvaluate what is necessary to manage security operationsUnderstand what operational controls and standards to implementDescribe the types of cloud deployment models in the types of “as a service” cloud models currently available todayIdentify key terminology, and associated definitions related to cloud technologyEstablish a common terminology for use with in your team or workgroupBuild a business case for cloud adoption and determine business units that benefit from cloud migration strategies, Certified Cloud Security Professional (CCSP) Course Objectives:Understand legal frameworks and guidelines that affect cloud servicesRecognize the fundamentals of data privacy regulatory/legislative mandatesAssess risks, vulnerability, threats, and attacks in the cloud environmentEvaluate the design and plan for cloud infrastructure security controlsEvaluate what is necessary to manage security operationsUnderstand what operational controls and standards to implementDescribe the types of cloud deployment models in the types of “as a service” cloud models currently available todayIdentify key terminology, and associated definitions related to cloud technologyEstablish a common terminology for use with in your team or workgroupBuild a business case for cloud adoption and determine business units that benefit from cloud migration strategies, Certified Cloud Security Professional (CCSP) Course Objectives:Understand legal frameworks and guidelines that affect cloud servicesRecognize the fundamentals of data privacy regulatory/legislative mandatesAssess risks, vulnerability, threats, and attacks in the cloud environmentEvaluate the design and plan for cloud infrastructure security controlsEvaluate what is necessary to manage security operationsUnderstand what operational controls and standards to implementDescribe the types of cloud deployment models in the types of “as a service” cloud models currently available todayIdentify key terminology, and associated definitions related to cloud technologyEstablish a common terminology for use with in your team or workgroupBuild a business case for cloud adoption and determine business units that benefit from cloud migration strategies, Certified Cloud Security Professional (CCSP) Course Objectives:Understand legal frameworks and guidelines that affect cloud servicesRecognize the fundamentals of data privacy regulatory/legislative mandatesAssess risks, vulnerability, threats, and attacks in the cloud environmentEvaluate the design and plan for cloud infrastructure security controlsEvaluate what is necessary to manage security operationsUnderstand what operational controls and standards to implementDescribe the types of cloud deployment models in the types of “as a service” cloud models currently available todayIdentify key terminology, and associated definitions related to cloud

technologyEstablish a common terminology for use with in your team or workgroupBuild a business case for cloud adoption and determine business units that benefit from cloud migration strategies, Certified Cloud Security Professional (CCSP) Course Objectives:Understand legal frameworks and guidelines that affect cloud servicesRecognize the fundamentals of data privacy regulatory/legislative mandatesAssess risks, vulnerability, threats, and attacks in the cloud environmentEvaluate the design and plan for cloud infrastructure security controlsEvaluate what is necessary to manage security operationsUnderstand what operational controls and standards to implementDescribe the types of cloud deployment models in the types of “as a service” cloud models currently available todayIdentify key terminology, and associated definitions related to cloud technologyEstablish a common terminology for use with in your team or workgroupBuild a business case for cloud adoption and determine business units that benefit from cloud migration strategies, Certified Cloud Security Professional (CCSP) Course Objectives:Understand legal frameworks and guidelines that affect cloud servicesRecognize the Detailed Course Outline

Cloud Security Operations, Cloud Security Operations, Cloud Security Operations, Cloud Security Operations, Cloud Security Operations, Cloud Application Security, Cloud Application Security, Cloud Application Security, Cloud Application Security, Cloud Application Security, Cloud Data Security, Cloud Data Security, Cloud Data Security, Cloud Data Security, Cloud Data Security, Cloud Platform and Infrastructure Security, Cloud Platform and Infrastructure Security, Cloud Platform and Infrastructure Security, Cloud Platform and Infrastructure Security, Cloud Platform and Infrastructure Security, Cloud Governance: Legal, Risk and Compliance, Cloud Governance: Legal, Risk and Compliance, Cloud Governance: Legal, Risk and Compliance, Cloud Governance: Legal, Risk and Compliance, Cloud Governance: Legal, Risk and Compliance, Cloud Concepts, Architecture and Design, Cloud Concepts, Architecture and Design, Cloud Concepts, Architecture and Design, Cloud Concepts, Architecture and Design, Cloud Concepts, Architecture and Design

Certification Path

Certified Cloud Security Professional (CCSP)

Exam: CCSP

Frequently Asked Questions

Q: What delivery options are available for CCSP Certified Cloud Security Professional Certification Prep?

We offer multiple delivery formats:

- Live Instructor-Led Classroom Online (Virtual/Live Online)
- Traditional Instructor-Led Classroom Training (ILT)
- On-site delivery at your offices anywhere in United Kingdom
- Private dedicated courses customized for your team

Q: What certification does this course prepare me for?

The CCSP Certified Cloud Security Professional Certification Prep course helps prepare you for the Certified Cloud Security Professional (CCSP) certification path.

Q: Which exam does this course prepare me for?

This course prepares you for the CCSP official exam. You can take this exam at any exam center across United Kingdom including London, Manchester, Birmingham, Edinburgh, or live online wherever you are located.

Q: How many CPD hours does this course provide?

The 1-day CCSP Certified Cloud Security Professional Certification Prep course provides up to 4.1 CPD hours of structured learning. CPD certificates can be provided upon request.

Q: What is the duration of the CCSP Certified Cloud Security Professional Certification Prep training?

The training takes place over 1 day(s), with each day lasting approximately 5.00 hours including breaks for lunch and refreshments.

Q: Do you provide corporate training for CCSP Certified Cloud Security Professional Certification Prep?

Yes, we provide corporate training, dedicated training, and closed classes for CCSP Certified Cloud Security Professional Certification Prep. Training can take place anywhere in United Kingdom including London, Manchester, Birmingham, Edinburgh, or live online allowing teams from across United Kingdom or internationally to attend.

Q: What related terms do people search for?

Popular related searches include: CCSP Certified Cloud Security Professional Certification Prep, ISC2, vILT

Q: Why choose Nexus Human for CCSP Certified Cloud Security Professional Certification Prep?

Nexus Human is recognized as one of the leading training providers. Our trainers have won multiple awards including:

- Small Firms Best Trainer Award
- National Training Partner of the Year (Ireland) - Multiple Years
- Global Top 30 Instructor Awards (2012, 2019, 2021)
- Tech Excellence Award Nominations
- Learning Performance Institute (LPI) External Training Provider Sponsor 2024

Q: Are there any discount codes available?

Yes! Use discount code **PENPAL5** when booking your CCSP Certified Cloud Security Professional Certification Prep training. Please note that only one discount code can be used per booking and cannot be combined with other special offers.
