Course Overview

The IAITAM Certified Software Asset Manager (CSAM) Course is a foundational education program that ensures students are able to manage software assets. Students also learn about the ever-changing variables throughout our industry. From software piracy and compliance issues to legislation and organizational challenges, it is necessary to evaluate both the internal and external influences that bring about change in how organizations manage their IT assets. A successful Software Asset Manager must look at the overall goals of the organization and determine where Software Asset Management will be a strategic influence in achieving those goals. This course also includes the exam for CSAM certification.
