Cisco Cloud Security Workshop for Partner SEs’

Category: Networking & Security | **Vendor:** Cisco

Duration: 16.00 hours (2 days) **13.0 CPD Hours** **Rating:** ⭐ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Who Should Attend

Network Planners, Network Managers, Network Consulting Engineers, Network Administrators, Technical Support Engineers, Channel Partners and System Engineers.

Prerequisites & Entry Requirements

General Prerequisites:

Foundational knowledge of IP networking and security principles.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

Cisco Umbrella is a cloud security platform that provides the first line of defense against threats on the internet. Being able to understand how this works and what the features are is the key focus of this first day

Cisco Cloudlock is a cloud-native cloud access security broker (CASB) that helps you move to the cloud safely. It protects your cloud users, data, and apps. Cloudlock's simple, open, and automated approach uses APIs to manage the risks in your cloud app ecosystem. Being able to understand how this works and what the features are is the key focus of the second day

Describe how to protect Office 365 environments including an introduction/demo of the Office 365 threat analyser tool utilizing Cloud ESA

Detailed Course Outline

Day 1

- Cisco Umbrella
