Cyber Security & ANTI-HACKING Workshop

Category: Networking & Security | **Vendor:** Various

Duration: 32.00 hours (4 days) **26.0 CPD Hours** **Rating:** ⭐ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Course Overview

Cybersecurity, attack techniques, and countermeasures: Learn about the latest hacker techniques and find out how to defend yourself against advanced attacks with limited security budget and time. The course uses realistic exercises to teach the basics of cybersecurity. The selection of the practical course content is based on the prestigious Mitre Att&ck project. The theoretical part is based on industry standards such as: NIST Standards, CIS Benchmarks, OWASP and PTES. In the course, we consistently change the perspective between attack and defense on every topic. This enables participants to derive direct defensive measures and quick wins from the experience of the practical laboratory exercises. The course is also discusses advanced topics such as antivirus bypass, WAFs, intrusion protection systems, firewalls, spam gateways, proxy whitelisting, sandboxes, EDRs, and XSS filters.

About This Course

- Cybersecurity basics
- Current threat situation
- Social Engineering
- Infrastructure security
- Linux Security
- Windows Security
- Post Exploitation
- Defense in Depth
- Detect attacks
- Web Security
- Denial of Service
- Network Security

Who Should Attend
