Red Hat Security: Identity Management and Active Directory Integration (RH362)

Category: Infrastructure & IT Operations | **Vendor:** Red Hat

Duration: 32.00 hours (4 days) **26.0 CPD Hours** **Rating:** ⭐ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Course Overview

Provide help to secure, centralized identity management services to coordinate user authentication and authorization with client systems, network services, and Windows domains.

Red Hat Security: Identity Management and Authentication (RH362) provides the skills to configure and manage Identity Management (IdM), the comprehensive identity management component bundled with Red Hat Enterprise Linux. This course helps students to gain the skills with this technology most requested by customers.

Some topics covered in this course are central management and provisioning of user accounts; design and installation of IdM server topologies; operation of the integrated DNS and TLS Certificate Authority services; management of two-factor authentication, smart card authentication, and operation as a single-sign on provider; integration and management of two-way trusts with Active Directory; and troubleshooting and disaster recovery planning. Registration of Linux clients to IdM and operation in enterprise environments that use both Linux and Microsoft Windows clients and servers is discussed.

About This Course

- Design an Identity Management topology for scale and resiliency.
- Describe key technologies used by IdM, including SSSD, PAM, Kerberos, and PKI.
- Install Identity Management (IdM) servers, replicas, and clients using Ansible Playbooks.
- Manage IdM services, including integrated DNS and CA.
- Configure and manage Kerberos authentication and secure services.
- Configure and manage TLS certificates.
- Create and manage a trust relationship with Microsoft Active Directory.
- Configure to help secure user authentication, including two-factor authentication and single sign-on.
- Configure and manage Sudo, HBAC, and RBAC policies.
- Manage secrets, vaults, certificates, and keys.
- Troubleshoot identity management.
- Integrate Satellite 6 and Red Hat Ansible Automation Platform with IdM.
- Configure IdM backup and recovery.

Who Should Attend

Red Hat Certified System Engineers (RHCE) who wish to learn how to provision and configure centralized identity management solutions for Linux clients and how to integrate them with other network services and identity management systems.

- Identity Management specialists or engineers
- Access Management specialists or engineers

Prerequisites & Entry Requirements

General Prerequisites:

- Take our free assessment to gauge whether this offering is the best fit for your skills.
- An RHCE certification or equivalent skill is a prerequisite to this course.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

Impact on the organization

Businesses will be able to integrate and centralize lifecycle management and security policy implementation and enforcement, and extend that consolidated management to additional enterprise configuration management products from the Red Hat portfolio, including Red Hat Ansible Automation Platform and Red Hat Satellite Server.

Impact on the individual

As a result of attending this course, you will gain an understanding of the architecture of an identity management realm and trusted relationships using both Identity Management in Red Hat Enterprise Linux and Microsoft Active Directory. You will be able to create, manage, and troubleshoot user management structures, security policies, local and remote secure access methods, and implementation technologies such as SSSD, Kerberos, PKI, and certificates.

Detailed Course Outline

- Identity Management in Red Hat Enterprise Linux
- Introduce Identity Management in Red Hat Enterprise Linux (IdM) and its high-level architecture.
- Identity Management Core Technologies
- Review the core technologies of Identity Management (IdM) in Red Hat Enterprise Linux.
- Installing Identity Management in Red Hat Enterprise Linux
- Install Identity Management servers, replicas, and clients on Red Hat Enterprise Linux 9.
- Implementing an Identity Management Topology
- Implement continuous functionality and high availability of IdM services in single-site and geographically distributed topologies.
- Managing the CA and DNS Integrated Services
- Manage the Certificate Authority (CA) and the Domain Name System (DNS) services that are integrated with Identity Management.

- Managing Users and Controlling User Access
- Configure users for authorized access to services and resources.
- Configuring Alternative Authentication Services
- Configure and manage smart card authentication, secrets, and two-factor authentication.
- Integrating Identity Management with Active Directory
- Implement a cross-forest trust between Identity Management and Active Directory, and configure ID views to map POSIX attributes to Active Directory users.
- Integrating Identity Management with Red Hat Utilities
- Integrate an Identity Management deployment with Red Hat Satellite and Red Hat Ansible Automation Platform.
- Troubleshooting and Disaster Recovery Planning for IdM
- Troubleshooting and preparing for disaster recovery with Identity Management.
- Comprehensive Review
- Build a small, resilient Identity Management topology to include multiple replicas and clients, populated with multiple users, credentials, policies, and access rights.

Skills You Will Learn:

Impact on the organization

Businesses will be able to integrate and centralize lifecycle management and security policy implementation and enforcement, and extend that consolidated management to additional enterprise configuration management products from the Red Hat portfolio, including Red Hat Ansible Automation Platform and Red Hat Satellite Server.

Impact on the individual

As a result of attending this course, you will gain an understanding of the architecture of an identity management realm and trusted relationships using both Identity Management in Red Hat Enterprise Linux and Microsoft Active Directory. You will be able to create, manage, and troubleshoot user management structures, security policies, local and remote secure access methods, and implementation technologies such as SSSD, Kerberos, PKI, and certificates.

Frequently Asked Questions

Q: What delivery options are available for Red Hat Security: Identity Management and Active Directory Integration (RH362)?

We offer multiple delivery formats:

- Live Instructor-Led Classroom Online (Virtual/Live Online)
- Traditional Instructor-Led Classroom Training (ILT)
- On-site delivery at your offices anywhere in United Kingdom
- Private dedicated courses customized for your team

Q: How many CPD hours does this course provide?

The 4-day Red Hat Security: Identity Management and Active Directory Integration (RH362) course provides up to 26.0 CPD hours of structured learning. CPD certificates can be provided upon request.

Q: What is the duration of the Red Hat Security: Identity Management and Active Directory Integration (RH362) training?

The training takes place over 4 day(s), with each day lasting approximately 32.00 hours including breaks for lunch and refreshments.

Q: Do you provide corporate training for Red Hat Security: Identity Management and Active Directory Integration (RH362)?

Yes, we provide corporate training, dedicated training, and closed classes for Red Hat Security: Identity Management and Active Directory Integration (RH362). Training can take place anywhere in United Kingdom including London, Manchester, Birmingham, Edinburgh, or live online allowing teams from across United Kingdom or internationally to attend.

Q: What related terms do people search for?

Popular related searches include: Red Hat Security: Identity Management and Active Directory Integration, Advanced System Administration, RH362

Q: Why choose Nexus Human for Red Hat Security: Identity Management and Active Directory Integration (RH362)?

Nexus Human is recognized as one of the leading training providers. Our trainers have won multiple awards including:

- Small Firms Best Trainer Award
- National Training Partner of the Year (Ireland) - Multiple Years
- Global Top 30 Instructor Awards (2012, 2019, 2021)
- Tech Excellence Award Nominations
- Learning Performance Institute (LPI) External Training Provider Sponsor 2024

Q: Are there any discount codes available?

Yes! Use discount code **PENPAL5** when booking your Red Hat Security: Identity Management and Active Directory Integration (RH362) training. Please note that only one discount code can be used per booking and cannot be combined with other special offers.
