Delivery Format: Instructor Led - Online

Course Overview

Requirements are the foundation of any successful project, yet poorly defined or misunderstood requirements are among the leading causes of project failure. This practical, one-day course provides participants with the knowledge and tools needed to effectively elicit, document, and analyze requirements, ensuring they are complete, clear, and aligned with business objectives.

About This Course

Requirements are the foundation of any successful project, yet poorly defined or misunderstood requirements are among the leading causes of project failure. This practical, one-day course provides participants with the knowledge and tools needed to effectively elicit, document, and analyze requirements, ensuring they are complete, clear, and aligned with business objectives.

Who Should Attend

This course is ideal for business analysts, project managers, product owners, developers, testers, and anyone involved in gathering or managing requirements for projects, whether in traditional or Agile environments.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

By the end of the course, participants will be able to:

- Define what constitutes a requirement and recognize the qualities of well-formed requirements.
- Apply a structured Requirements Engineering framework.
- Select and use appropriate elicitation techniques such as interviews, workshops, observation, storytelling, prototyping, and document analysis.
- Document requirements effectively using catalogues, user stories, and use case models.
- Analyze requirements for relevance, feasibility, and quality.
- Prioritize requirements using the MoSCoW method.

Detailed Course Outline

- **Introduction to Requirement Engineering**
  - Definition of a requirement
  - Characteristics of a good requirement
  - Types of requirements
  - RE framework

Requirements Elicitation

  - The scope of elicitation work
  - The significance of knowledge types: tacit (corporate and individual) and non-tacit (corporate and individual)
  - Uses, advantages and disadvantages of elicitation techniques:
    - Interviewing
    - Workshops
    - Observation (including shadowing)
    - Storytelling
    - Scenario analysis & scenario role-play
    - Prototyping (including storyboards & wireframes)
    - Document analysis & record searching
  - Selection of appropriate techniques
  - Suitability of elicitation techniques for linear and Agile projects

Documenting Requirements

  - Requirements catalogue
  - User stories
  - Use case models

Requirements Analysis

  - Ensuring fitness for purpose
  - Applying requirements filters:
    - Unravelling multiple requirements
    - Checking for overlapping or duplicate requirements

Confirming relevance (congruence with business & project objectives)

- Evaluating feasibility
- Removing conflicts
- Checking for solutions

- Checking and improving quality (specific, measurable, traceable, etc.)
- Prioritising requirements using MoSCoW

Additional Course Details
