Course Overview

The Agile Product Management course allows you to discover the right mindset, skills, and tools you need to create successful products and solutions using Agile techniques. Learn how to use Design Thinking to create products and solutions that are:

- Desirable – what customers want
- Viable – profitable for you to build and sell
- Feasible – something you can realistically deliver
- Sustainable – something you can proactively manage to realize ROI

Attendees will recognize how Continuous Exploration fuels innovation and helps you define a vision, strategy, and roadmap to tap into new markets. Find out how to accelerate the product lifecycle to get fast feedback and quickly deliver exceptional products and solutions that delight customers – all while aligning with your organization’s strategy, portfolio, evolving architecture, and solution intent.
