SSCP - Systems Security Certified Practitioner Certification Prep

Category: Networking & Security | **Vendor:** ISC2

Duration: 5.00 hours (1 days) **4.1 CPD Hours** **Rating:** ⭐ 4.6 (5,878 reviews)

Course Information

Delivery Format:	vILT
Certification:	Systems Security Certified Practitioner (SSCP)
Related Exam:	SSCP

Course Overview

Develop the skills to assess and manage security threats and protect enterprise data and assets. SSCP course enables learners to respond to incidents and ensure better enterprise data protection through business continuity plans, disaster recovery plans, and security services for threat prevention.

About This Course

Develop the skills to assess and manage security threats and protect enterprise data and assets. SSCP course enables learners to respond to incidents and ensure better enterprise data protection through business continuity plans, disaster recovery plans, and security services for threat prevention.

Who Should Attend

Systems administration experience, An understanding of UNIX, Linux, and Windows, Intermediate-level knowledge of the security concepts, Familiarity with TCP/IP

Learning Outcomes

Upon successful completion of this course, participants will be able to:

Course ObjectivesDescribe security and the alignment of asset management to risk managementAppraise risk management options and the use of access controls to protect assetsExamine the field of cryptography to secure information and communicationBuild a security posture by securing software, data, and endpointsApply network and communications security to establish a secure networked environmentEvaluate cloud and wireless securityPrepare for incident detection and responseImplement appropriate measures that contribute to the maturation of risk management, Course ObjectivesDescribe security and the alignment of asset management to risk managementAppraise risk management options and the use of access controls to protect assetsExamine the field of cryptography to secure information and communicationBuild a security posture by securing software, data, and endpointsApply network and communications security to establish a secure networked environmentEvaluate cloud and wireless securityPrepare for incident detection and responseImplement appropriate measures that contribute to the maturation of risk management, Course ObjectivesDescribe security and the alignment of asset management to risk managementAppraise risk management options and the use of access controls to protect assetsExamine the field of cryptography to secure information and communicationBuild a security posture by securing software, data, and endpointsApply network and communications security to establish a secure networked environmentEvaluate cloud and wireless securityPrepare for incident detection and responseImplement appropriate measures that contribute to the maturation of risk management, Course ObjectivesDescribe security and the alignment of asset management to risk managementAppraise risk management options and the use of access controls to protect assetsExamine the field of cryptography to secure information and communicationBuild a security posture by securing software, data, and endpointsApply network and communications security to establish a secure networked environmentEvaluate cloud and wireless securityPrepare for incident detection and responseImplement appropriate measures that contribute to the maturation of risk management, Course ObjectivesDescribe security and the alignment of asset management to risk managementAppraise risk management options and the use of access controls to protect assetsExamine the field of cryptography to secure information and communicationBuild a security posture by securing software, data, and endpointsApply network and communications security to establish a secure networked environmentEvaluate cloud and wireless securityPrepare for incident detection and responseImplement appropriate measures that contribute to the maturation of risk management, Course ObjectivesDescribe security and the alignment of asset management to risk managementAppraise risk management options and the use of access controls to protect assetsExamine the field of cryptography to secure information and communicationBuild a security posture by securing software, data, and endpointsApply network and communications security to establish a secure networked environmentEvaluate cloud and wireless securityPrepare for incident detection and responseImplement appropriate measures that contribute to the maturation of risk management, Course ObjectivesDescribe security and the alignment of asset management to risk managementAppraise risk management options and the use of access controls to protect

Detailed Course Outline

Maturing Risk Management, Maturing Risk Management, Maturing Risk Management, Incident Detection and Response, Incident Detection and Response, Incident Detection and Response, Cloud and Wireless Security, Cloud and Wireless Security, Cloud and Wireless Security, Network and Communications Security, Network and Communications Security, Network and Communications Security, Securing Software, Data, and Endpoints, Securing Software, Data, and Endpoints, Securing Software, Data, and Endpoints, Cryptography, Cryptography, Cryptography, Introducing Security and Aligning Asset Management to Risk Management, Introducing Security and Aligning Asset Management to Risk Management, Introducing Security and Aligning Asset Management to Risk Management, Understanding Risk Management Options and the Use of Access Controls to Protect Assets, Understanding Risk Management Options and the Use of Access Controls to Protect Assets, Understanding Risk Management Options and the Use of Access Controls to Protect Assets

□□ Certification Path

Systems Security Certified Practitioner (SSCP)

Exam: SSCP

Frequently Asked Questions

Q: What delivery options are available for SSCP - Systems Security Certified Practitioner Certification Prep?

We offer multiple delivery formats:

- Live Instructor-Led Classroom Online (Virtual/Live Online)
- Traditional Instructor-Led Classroom Training (ILT)
- On-site delivery at your offices anywhere in United Kingdom
- Private dedicated courses customized for your team

Q: What certification does this course prepare me for?

The SSCP - Systems Security Certified Practitioner Certification Prep course helps prepare you for the Systems Security Certified Practitioner (SSCP) certification path.

Q: Which exam does this course prepare me for?

This course prepares you for the SSCP official exam. You can take this exam at any exam center across United Kingdom including London, Manchester, Birmingham, Edinburgh, or live online wherever you are located.

Q: How many CPD hours does this course provide?

The 1-day SSCP - Systems Security Certified Practitioner Certification Prep course provides up to 4.1 CPD hours of structured learning. CPD certificates can be provided upon request.

Q: What is the duration of the SSCP - Systems Security Certified Practitioner Certification Prep training?

The training takes place over 1 day(s), with each day lasting approximately 5.00 hours including breaks for lunch and refreshments.

Q: Do you provide corporate training for SSCP - Systems Security Certified Practitioner Certification Prep?

Yes, we provide corporate training, dedicated training, and closed classes for SSCP - Systems Security Certified Practitioner Certification Prep. Training can take place anywhere in United Kingdom including London, Manchester, Birmingham, Edinburgh, or live online allowing teams from across United Kingdom or internationally to attend.

Q: What related terms do people search for?

Popular related searches include: SSCP - Systems Security Certified Practitioner Certification Prep, ISC2, vILT

Q: Why choose Nexus Human for SSCP - Systems Security Certified Practitioner Certification Prep?

Nexus Human is recognized as one of the leading training providers. Our trainers have won multiple awards including:

- Small Firms Best Trainer Award
- National Training Partner of the Year (Ireland) - Multiple Years
- Global Top 30 Instructor Awards (2012, 2019, 2021)
- Tech Excellence Award Nominations
- Learning Performance Institute (LPI) External Training Provider Sponsor 2024

Q: Are there any discount codes available?

Yes! Use discount code **PENPAL5** when booking your SSCP - Systems Security Certified Practitioner Certification Prep training. Please note that only one discount code can be used per booking and cannot be combined with other special offers.
