Tableau Desktop II: Intermediate

Category: AI, Data & Analytics | **Vendor:** Tableau

Duration: 16.00 hours (2 days) **13.0 CPD Hours** **Rating:** ⭐ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Course Overview

This course is designed to expand your skills and distinguish yourself as a Tableau power user. It’s structured for those who have a working experience with Tableau and want to take it to the next level. You should understand how to build basic worksheets and dashboards, but may scratch your head when working with more complex issues.

About This Course

This course is designed to expand your skills and distinguish yourself as a Tableau power user. It’s structured for those who have a working experience with Tableau and want to take it to the next level. You should understand how to build basic worksheets and dashboards, but may scratch your head when working with more complex issues.

Who Should Attend

This course is designed to provide you with the skills required to become a Tableau power user. It’s made for the professional who has solid working experience with Tableau and wants to take it to the next level. You should have a deep understanding of all the fundamental concepts of building worksheets and dashboards, but may scratch your head when working with more complex issues.

Prerequisites & Entry Requirements

General Prerequisites:

Tableau Desktop I: Fundamentals or equivalent experience.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

Build advanced chart types and visualizations. Build complex calculations to manipulate your data. Use statistical techniques to analyze your data. Use parameters and input controls to give users control over certain values. Implement advanced geographic mapping techniques and use custom images and geocoding to build spatial visualizations of non-geographic data. Prep your data for analysis. Combine data sources using data blending. Combine data from multiple tables in the same data source using joins. Make your visualizations perform as well as possible using the Data Engine, extracts, and efficient connection methods. Build better dashboards using techniques for guided analytics, interactive dashboard design, and visual best practices. Implement efficiency tips and tricks.
